

### ***ISAK COMPATIBLE ATHLETE MEASURING STATION***

**HEIGHT, SITTING HEIGHT, HAND SIZE, WINGSPAN**

**WHAT. WHY. HOW.**

*Measuring an athlete. Easy. Fast. Accurate. Unarguable.*

#### **What.**

#### **It is**

**Standards.**

**They are important.**

We have updated our athlete measurement system for the inaugural MLB combine in 2021:

#### **ISAK Standard Compatible:**

- All measurements in Centimeters with 0.1 cm increments. (don't worry – a conversion chart included)
- Includes sitting height measurement.
- ISAK hand measurement in addition to hand span.

#### **Measures the following for Athletes:**

- Height
- Sitting height
- Hand span
- Wing Span
- Hand Size

#### **Why.**

#### **We designed it**

Zybek Sports has learned a few things from testing over 100,000 athletes in the past 10 years. This is why we build it:

#### **IT'S IMPORTANT:**

- Size Matters; it is often not measured correctly

#### **IT'S FAST:**

- Easy to read height and reach measurements
- Optional barcode scanning makes it even faster.

#### **IT'S ACCURATE:**

- Fixed base; unchangeable ruler on metal fixture.

#### **IT'S EASY:**

- Read the number on the ruler.

#### **IT'S REAL. IT'S UNARGUABLE:**

- The #1 'concern' Zybek receives after an event: "You have my height wrong. My doctor says I am "X" tall..." That's the real reason we build it.
- Athlete steps on the base and the system is lowered to contact athlete head.
- The height is read.
- Measuring system stays in place.
- Athlete can verify the measure themselves
- No questions.

#### **How.**

#### **It's done**

#### **ATHLETE HEIGHT:**

- Athlete removes shoes. Heels against backstop.
- Measuring device lowered to touch athlete's head.
- Height number is recorded.

#### **ATHLETE SITTING HEIGHT:**

- Athlete sits on 40cm bench.
- Measuring device lowered to touch athlete's head.
- Height number is recorded.

#### **WING SPAN:**

- Athlete places fingers on fixed side of measure bar.
- Athlete pushes movable end as far out as possible.
- Distance recorded.

#### **HAND SPAN:**

- Middle finger touches end stop.
- White indicator moved to wrist. Distance read.
